John Graham

Chief Information Officer

John Graham is a young professional seeking to revolutionize healthcare by empowering patients to make informed decisions when selecting medical providers. By combining a background in economics and healthcare analytics with a passion for technology, John leverages information systems and technology to improve healthcare outcomes.

John Graham

Chief Information Officer

Words of Advice

- **Capitalize** on your opportunity to learn all the latest technologies. Consider all the potential applications and then experiment.
- **Practice** newly learned skills and techniques on your own using open source tools and datasets.
- **Listen** and keep an open mind, not only with your professors but also with your fellow students who will be from a variety of backgrounds.

Alexis (Lexi) Quinn, RHIA

Universal Health Services, Inc.
Application Analyst – Corporate Cerner HIM team

- Support of the Cerner HIM applications: CPDI, Profile, Clinical Reporting, and RRD.
